COLLEGE AND CONGRESS COMMITTEES

College and Congress committees are created or abolished and their overall functions defined by the Executive Board. Appointments are made for one year, with the understanding that such appointments may be continued for a total of three years, provided that the appointee is able to devote the necessary effort to the work of the committee. Approximately 50 new appointments are made annually.

The majority of the committee members are Fellows, but Junior Fellows also are eligible for appointment. Some committees may have representatives from other organizations when this is particularly appropriate to committee activities.

The activities of the committees are coordinated by the responsible staff vice presidents. Each committee reports, at a minimum, twice annually to the Executive Board. Committee descriptions may be found on the College web site, under the Membership tab, by clicking on "Committees and Councils."
