IMPROVE YOUR HOSPITAL’S QUALITY OF CARE AND REDUCE RISK WITH PEER REVIEW

www.acog.org/vrqc
ACOG is the nation’s leading expert in women’s health care.

For more than 30 years, the Voluntary Review of Quality of Care (VRQC) program has been assisting inpatient facilities across the country with meaningful analysis and recommendations.

VRQC offers unbiased and customized site visits led by a team of ACOG Fellows who provide a comprehensive assessment of:

» Clinical issues, such as induction of labor, cesarean delivery, and gynecologic procedures
» Leadership and communication
» Policies and procedures
» Organizational and systems issues
ONE REVIEW, COUNTLESS BENEFITS

» Identify issues underlying adverse events
» Improve teamwork and trust
» Enhance patient-centered care
» Better your position for value-based payments

A STRAIGHTFORWARD PROCESS

» In-person, four-day visit by practicing ob-gyns and nurses with 10+ years of quality review expertise
» Additional reviewers may include certified nurse midwives, anesthesiologists, or family physicians
» Assessment includes facility tour, interviews, and peer review of medical records
» Evaluation using evidence-based ACOG guidelines
» Final report with findings, actionable recommendations, and ACOG resources

VOLUNTARY AND CONFIDENTIAL
Join hospitals across the nation who have gained valuable insight from the VRQC experience:

“The comprehensive and thorough review provided by the VRQC team helped to identify current gaps in our care delivery systems and offered evidence-based recommendations for improvement.”

CHAIRMAN, DEPARTMENT OF OBSTETRICS AND GYNECOLOGY

“The VRQC Program was able to identify areas of concern in our hospital in a very organized, collegial fashion. The team arrived well prepared and ready to work... We are looking forward to bringing back the program for a repeat review when the improvements have been put in place.”

DIRECTOR, MEDICAL AFFAIRS

“It is a rare opportunity to have a clinical program reviewed by an organization that enjoys the respect of the medical staff, nursing, and administration. Because of this, we have been able to act upon the report’s recommendations with an unusual degree of agreement and cooperation among the three stakeholder groups.”

VICE PRESIDENT, MEDICAL AFFAIRS
