Cystoscopy Objectives

Objectives

• Name all of the components of, correctly assemble, and manipulate a cystoscope.
• Demonstrate how to use diagnostic cystoscopy to assess for urinary tract injury during gynecologic procedures.
• Describe ureteral patency and appropriate techniques to demonstrate it.

Description of lab

This lab is intended for first through fourth year residents. The overall time needed to complete the labs is 1½-2½ hours (not including setup time).

• 30 minute preparation time for setup by course director
• Lab time for resident participation
  o 30 minutes for the OSATS (observed structured assessment of technical skill)
  o Ideally this is done before the educational component to test core knowledge.
  o 15-20 minutes for the didactic PowerPoint lecture
  o 30-60 minutes for directed resident experience assembling the cystoscope and performing the diagnostic cystoscopy.
