Intrauterine Device (IUD) Insertion

Objectives

1. The learner will be able to state verbally or in writing the indications and contraindications for intrauterine device placement.
2. The learner will be able to properly counsel a patient on all of the risks, benefit, and alternatives of an intrauterine device.
3. The learner will be able to state verbally or in writing the equipment and supplies necessary to successfully perform the placement of an intrauterine device.
4. The learner will be able to demonstrate in a simulated environment the steps of an intrauterine device placement.

Description of Lab

This module presents a clinical simulation for training residents to perform an intrauterine device (IUD) placement. It further explains the procedure and potential complications for an office IUD placement procedure.
