Laparoscopic Salpingectomy for Ectopic Pregnancy

Learning Objectives

1. Identify appropriate surgical candidates for management of ectopic pregnancy
2. Explain the differences in surgical approaches to ectopic management
3. List the steps of each surgical approach
4. Provide appropriate post-surgical follow up after treatment for ectopic pregnancy

Description of Lab

This module presents a clinical simulation for training residents to perform a salpingectomy for an ectopic pregnancy. It further explains the procedure and potential complications for the procedure.
