The impact of a woman’s death during childbirth is long-lasting. For the team entrusted with her care and her family, the loss is devastating. ACOG District II would like to take this opportunity to thank those obstetric providers, ob-gyns, labor and delivery nurses, midwives, anesthesiologists, family practitioners — and hospital administrators who graciously donated their time and expertise to the Safe Motherhood Initiative. This team’s knowledge, input, and commitment to improve obstetric care quality and management are unsurpassed. Without their diligence, the Initiative would be an insurmountable undertaking.

We would also like to thank our collaborative partners, the California Maternal Quality Care Collaborative (CMQCC) and the Association of Women’s Health, Obstetric and Neonatal Nurses (AWHONN) for their willingness to share ideas and best practices from their respective states to reduce adverse obstetric events.

And finally, we would like to express our gratitude to Merck for Mothers for helping to form lasting learning relationships across the country and globally, and for investing resources in New York State to ensure that motherhood is, indeed, safe.

Safe Motherhood Initiative Steering Committee
