Indication for induction: (choose one)

❏ Medical complication or condition (1): Diagnosis: __________________________

❏ Nonmedically indicated (1–3): Circumstances: ____________________________

Patient counseled about risks, benefits, and alternatives to induction of labor (1)

❏ Consent form signed as required by institution

Bishop Score (see below) (1): __________

Gestational age of 39 0/7 weeks or older confirmed by either of the following criteria (1):

❏ Ultrasound measurement at less than 20 weeks of gestation supports gestational age of 39 weeks or greater

❏ Fetal heart tones have been documented as present for 30 weeks of gestation by Doppler ultrasonography

Pertinent prenatal laboratory test results (eg, group B streptococci or hematocrit) available (4, 5)

Special concerns (eg, allergies, medical problems, and special needs): _______________________

To be completed by reviewer:

❏ Approved induction after 39 0/7 weeks of gestation by aforementioned dating criteria

❏ Approved induction before 39 0/7 weeks of gestation (medical indication)

❏ HARD STOP – gestational age, indication, consent, or other issues prevent initiating induction without further information or consultation with department chair
References

Standardization of health care processes and reduced variation has been shown to improve outcomes and quality of care. The American College of Obstetricians and Gynecologists has developed a series of patient safety checklists to help facilitate the standardization process. This checklist reflects emerging clinical, scientific, and patient safety advances as of the date issued and is subject to change. The information should not be construed as dictating an exclusive course of treatment or procedure to be followed. Although the components of a particular checklist may be adapted to local resources, standardization of checklists within an institution is strongly encouraged.

How to Use This Checklist

The Patient Safety Checklist on Scheduling Induction of Labor should be completed by the health care provider and submitted to the respective hospital to schedule an induction of labor. The hospital should establish procedures to review the appropriateness of the scheduling based on the information contained in the checklist. A hard stop should be called if there are questions that arise that require further information or consultation with the department chair.
