Professional Liability and Gynecology-Only Practice

**ABSTRACT:** Fellows of the American College of Obstetricians and Gynecologists may choose to limit the scope of their practices to gynecology and, accordingly, may choose not to carry professional liability coverage for obstetrics. The American College of Obstetricians and Gynecologists considers early pregnancy care to be within the scope of gynecology and gynecologic practice. Liability insurers that provide coverage for gynecology-only practices should provide coverage for clinical practice activities that involve the management of first-trimester and early second-trimester pregnancy and its complications.

Fellows of the American College of Obstetricians and Gynecologists may choose to limit the scope of their practices to gynecology and, accordingly, may choose not to carry professional liability coverage for obstetrics. However, the American College of Obstetricians and Gynecologists considers early pregnancy care to be within the scope of gynecology and gynecologic practice. Management of early pregnancy failure, ectopic pregnancy, spontaneous or elective abortion, and early prenatal care may be properly undertaken in such practices. Liability insurers that provide coverage for gynecology-only practices should provide coverage for clinical practice activities that involve the management of first-trimester and early second-trimester pregnancy and its complications.
This information is designed as an educational resource to aid clinicians in providing obstetric and gynecologic care, and use of this information is voluntary. This information should not be considered as inclusive of all proper treatments or methods of care or as a statement of the standard of care. It is not intended to substitute for the independent professional judgment of the treating clinician. Variations in practice may be warranted when, in the reasonable judgment of the treating clinician, such course of action is indicated by the condition of the patient, limitations of available resources, or advances in knowledge or technology. The American College of Obstetricians and Gynecologists reviews its publications regularly; however, its publications may not reflect the most recent evidence. Any updates to this document can be found on acog.org or by calling the ACOG Resource Center.

While ACOG makes every effort to present accurate and reliable information, this publication is provided “as is” without any warranty of accuracy, reliability, or otherwise, either express or implied. ACOG does not guarantee, warrant, or endorse the products or services of any firm, organization, or person. Neither ACOG nor its officers, directors, members, employees, or agents will be liable for any loss, damage, or claim with respect to any liabilities, including direct, special, indirect, or consequential damages, incurred in connection with this publication or reliance on the information presented.

All ACOG committee members and authors have submitted a conflict of interest disclosure statement related to this published product. Any potential conflicts have been considered and managed in accordance with ACOG’s Conflict of Interest Disclosure Policy. The ACOG policies can be found on acog.org. For products jointly developed with other organizations, conflict of interest disclosures by representatives of the other organizations are addressed by those organizations. The American College of Obstetricians and Gynecologists has neither solicited nor accepted any commercial involvement in the development of the content of this published product.
